# ClarifyAI

AI-Powered Campus Assistant

# The Problem

## Information Overload

Students waste countless hours navigating fragmented campus information.

## Repetitive Tasks

Administrative staff are bogged down by repetitive questions daily.

## Scattered Data

Campus information is often scattered, outdated, and hard to access.

## Delayed Answers

Critical answers are delayed by limited office hours and slow response times.

# Instant. Intelligent. Available 24/7.

**Real-time AI conversations powered by Groq (Llama 3.1)**
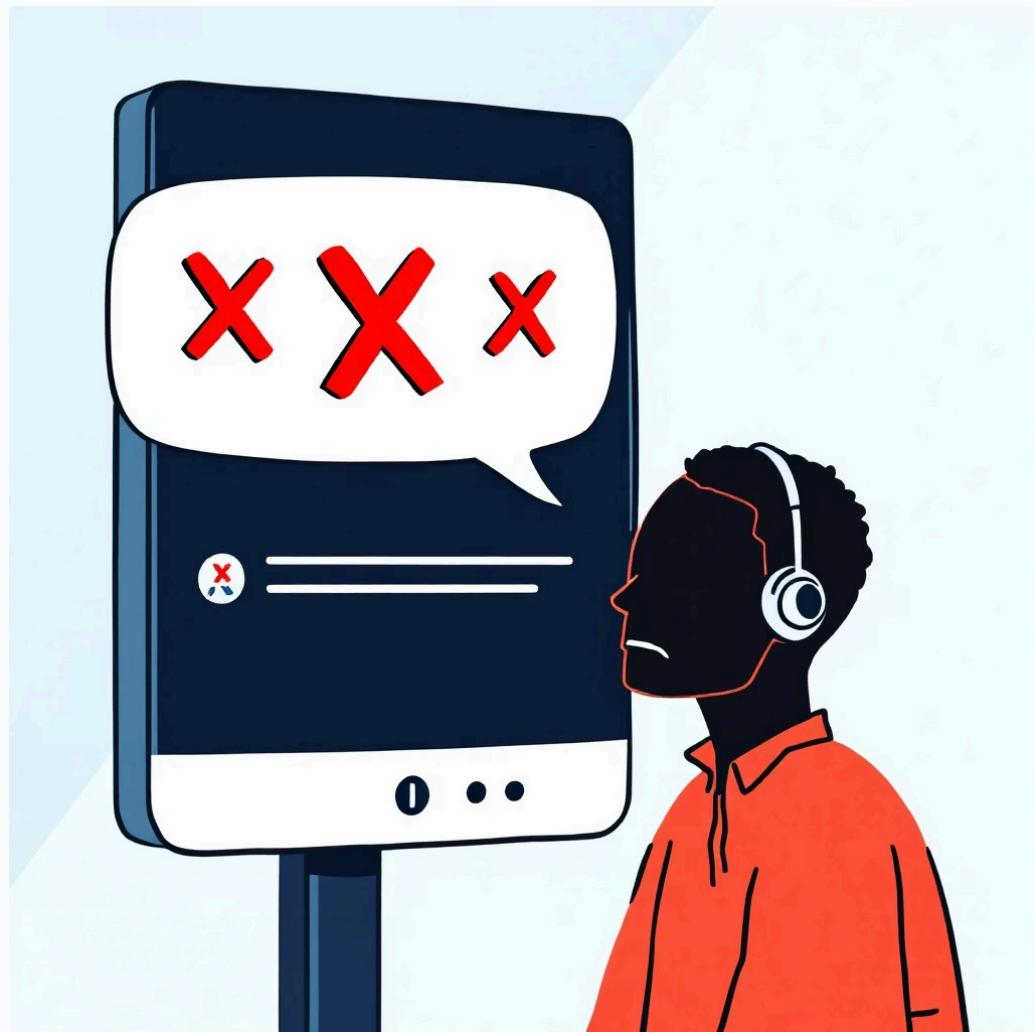

- Sub-second responses—no waiting
- Understands natural language
- Secure login (Google OAuth + Email)
- Admin dashboard—updates go live instantly
- Complete chat history

# Built Different
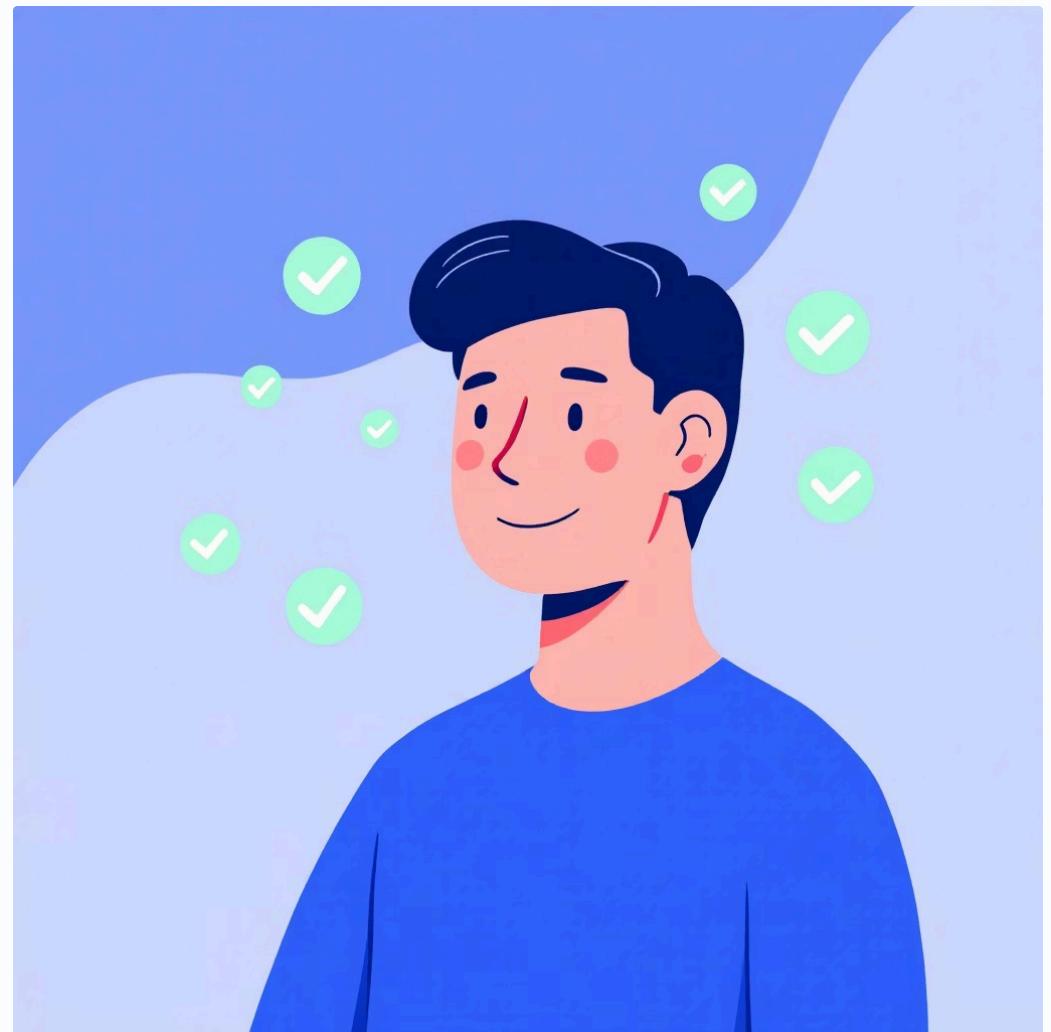

## Traditional Chatbots

→ Rigid decision trees

→ 5+ second delays

→ No context memory

→ Outdated information

→ Frustrating experience

## ClarifyAI

→ Natural conversations

→ Sub-second responses

→ Context-aware intelligence

→ Real-time updates

→ Delightful user experience

# Modern. Fast. Reliable.

### Supabase
Realtime Postgres backend

### React + TypeScript
Fast, type-safe UI

### Modern Integration Stack

### Groq AI
Scalable inference engine

### FastAPI
Lightweight, high-performance API

Our architecture is designed for peak performance and seamless integration.

Made with GAMMA

# Six Core Systems
